OBJECTIVE

Highly motivated Computer Science graduate seeking to start my career as a Data Entry Operator / Back Office Associate. Eager to utilize my strong computer, data handling, analytical, and problem-solving skills to support day-to-day business operations. Committed to learning quickly, maintaining data accuracy, completing tasks within deadlines, and contributing positively to team goals. Focused on being a dedicated, punctual, flexible, and responsible professional.

EDUCATION

2022–2026	Bachelor of Technology, Computer Science and Engineering, Marri Laxman Reddy Institute of Technology and Management, Hyderabad	CGPA: 7.20
2020–2022	Intermediate, MPC, Susheela Memorial Junior College, Madhira	61%
2020	SSC, ZPH School, Madupalli	98%

SKILLS

Data Entry & Operations: Data Entry, Data Processing, Data Validation, Data Management, Backend Operations, Back Office Operations, MIS, Record Management
Office & Spreadsheet Tools: MS Office, MS Excel, MS Word, MS PowerPoint, Google Sheets, Google Workspace, Spreadsheets
Professional Skills: Communication Skills, Team Collaboration, Hard Working, Smart Working, Dedicated, Punctual, Flexible, Quick Learner
Technical Skills: Python, SQL, MongoDB, HTML, CSS, Git, GitHub

PROJECTS

AI-Based Medical Laboratory System — Academic Project

- Developed a healthcare and laboratory management platform using React, Node.js, Express.js, MongoDB, and Python.
- Worked with user information, laboratory services, system records, and structured application data.
- Performed data processing and validation while implementing authentication, role-based workflows, and REST APIs.
- Core Skills: Data Handling, Data Validation, Documentation, Computer Operations, MongoDB.

Fake Job Detection Using Machine Learning — Machine Learning Project

- Worked with real-world job-posting datasets to identify patterns associated with potentially fraudulent job opportunities.
- Performed data preprocessing, feature extraction, data organization, and analysis.
- Maintained accuracy while preparing and processing structured datasets for machine learning.
- Core Skills: Data Processing, Data Analysis, Data Validation, Problem Solving, Python.

INTERNSHIP EXPERIENCE

Deep Learning Intern — Central Institute of Tool Design (CITD)

- Worked with datasets involving data collection, preprocessing, organization, and validation using Python-based tools.
- Applied technical concepts to assigned tasks while following project requirements and maintaining organized data.
- Core Skills: Data Processing, Data Organization, Python, Analytical Thinking, Problem Solving.

Google Android Developer Virtual Intern — EduSkills

- Learned Android application development fundamentals, application lifecycle, UI design, and responsive interface development.
- Worked with computer-based development tools and project requirements while completing assigned tasks.
- Core Skills: Computer Operations, Documentation, Problem Solving, Communication, Team Collaboration.

CERTIFICATIONS

- EF SET English Certificate
- Smart Coder Certification – Smart Interviews
- ServiceNow Certified System Administrator (CSA) – ServiceNow
